

Here at Butler Dental we are a family friendly and community orientated practice.

We would like to offer our services to our local and surrounding schools. Talking to the children and educating them about

- Tooth brushing
- Good foods and bad foods
- What to expect when visiting the dentist

All the while keeping it fun and exciting!

We are more than happy to come in at a time which suits the school and the classes curriculum.

We would also like to bring awareness to parents regarding the Medicare Child Dental Benefit Scheme. Many families are unaware they are eligible for this service

- \$1000 per child over 2 consecutive calendar years
- For children ages between 2 – 17
- A range of services e.g. exam, x-rays, cleaning, fissure sealants, fillings and much more

To get this information to parents we have an advert prepared that could be put into your school newsletter should you feel this would be beneficial to your pupils and their families.

Please do not hesitate to get in touch with us with any questions or enquiries you may have.

Kind Regards,

The Butler Dental Team
